

Native MPEG-Dash + HLS Playback

Privacy Policy

Version History

Version	Date Modified	Notes
1.0.0	2024-02-09	Initial Publication

Purpose of this document

This document exists to help the users of Native MPEG-Dash + HLS Playback ("this extension", "the extension", or "extension" in further text) to understand how their information is stored, used, and transmitted. I reserve the right to update this document at any given time. Be sure to check for updates. Release notes on the extension install trigger will reflect this link.

By continuing to use the extension, you are agreeing to this policy.

Cookie policy

The extension does not store, read or transmit any cookies in any context.

Information (Local) Storage Policy

Extension uses browser local storage for core functionality. Whatever core functionality information is stored it is

- Non-identifiable
- Not transmitted over any network
- Not disclosed to third parties
- Used for core functionality during normal usage
- Saved on user's local disk drive

Traffic to other websites

This extension is used for playing HTTP Streaming over the internet which means engaging with any public URL can result in collecting the user's personal data on those websites. The extension, or I (the developer), are not held responsible for user's data protection when the user decides to engage with those sources. Visiting and engaging with those URLs are not governed by this privacy policy agreement. The extension also links to github.com and paypal.me. Be sure to read their privacy policies before visiting the links.
